 Data Lake  
for **ALL**

Network Observability | Infrastructure Monitoring | Log Analytics

Motadata AIOps is a platform for enterprises to enable their IT teams with context to prevent service disruptions in complex, modern IT environments. Unify data-collection, full-stack monitoring and remediation by ingesting metrics, dependency data, events, and traffic & logs data. Gain visibility into network components across all cloud and on-premises systems to immediately alert, isolate and resolve any network issue before it affects IT service delivery.

### Mota Agent

Agent-based data collection with granularity as low as 1 sec

### Mota Mapper

Run-time dependency scanning for Topology, correlation & RCA

### Mota Store

Index-less, Type-less, and Schema-less Datastore

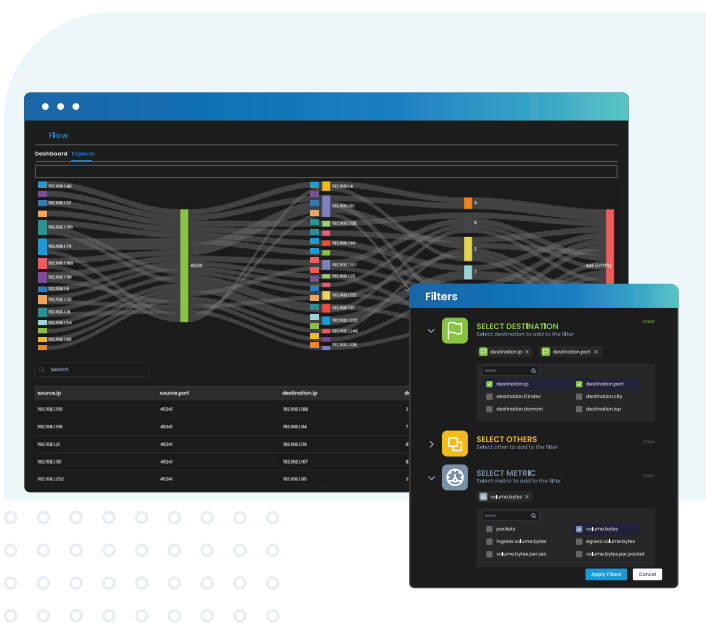

### Mota AI

AI/ML-powered anomaly detection and forecasting for capacity planning

## Motadata AIOps - Network Observability

Motadata's Network Observability provides complete visibility into an organization's network through continuous data collection and AI-driven correlation. It processes a wide range of data collected from cloud networks & services, SD-WAN, hybrid networks, and many more. Monitor across on-prem and cloud infrastructure and isolate events from logs, metrics, traffic, and streaming data for enhanced observability.

### Key Features

- **Monitor** metrics, traffic, streaming and log data
- **Baselining** on KPIs and traffic data
- Automated network **topology mapping** and analysis
- In-depth **Dependency** data mapping
- **AI-driven** Correlation
- Built-in **Anomaly** detection and forecasting
- Quicker **RCA** with cross-domain correlation
- Built-in **Automation** runbook engine
- Extend capabilities with custom **Plugins**
- **Intelligent** Alerting

## Motadata AIOps – Infrastructure Monitoring

A unified platform for monitoring, log indexing, visualizing, and alerting events across a hybrid infrastructure. It enables IT leaders to deliver business outcomes through data-driven decisions. Our broad coverage, simplified deployment, and easy-to-use interface help the IT and DevOps teams to troubleshoot on-prem and cloud infra issues more effectively.

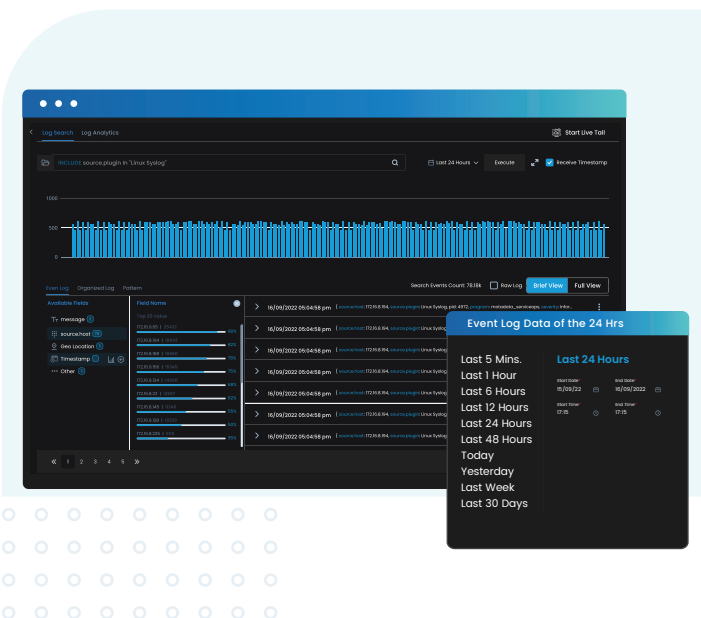

### Key Features

- **Agent-based** and **Agent-less** monitoring
- Broad monitoring coverage including **public cloud**
- **One agent** for metrics, packets, logs data
- Dependency mapping & **correlation**
- Intelligent alerting powered by **AI**
- **Anomaly** detection and baselining of data
- Pre-define **dashboard**, templates & reports
- **Dynamic** log parsing & indexing
- Scale to **billions** of metrics
- **Policy-driven** automated asset baseline
- Log collection and **processing**
- **Dynamic** report builder

## Motadata AIOps – Log Analytics

Collect, analyze, monitor, and visualize the log data for rapid investigation, troubleshooting, and higher-level analytics with Motadata Log Analytics. Its collection methods unify logs, metrics, and streaming data for a centralized view. As logs are forwarded, Motadata clusters the received log data in real-time and intelligently surfaces trends in log activity.

### Key Features

- AI based alerting to detect **anomaly** on log patterns
- **Agent-based** and **Agent-less** log collection
- Log clustering in **real-time**
- Log pattern analytics across **millions of logs**
- Search, filter, and analyze logs **on the fly**
- Log **live trail** to access any log in **real-time**
- **Dynamic** log parsers to enrich logs
- **Auto-parsing** for network, infra, cloud and JSON logs
- **Custom** log parsing apps support

# AIOps Context + Visibility

Get most out of  
IT Operation

## BENEFITS

- Get context from all events across network
- Complete visibility across your IT stack
- Modern metrics, logs & traffic analytics
- Rapid investigation & troubleshooting
- Scale fast with confidence

Reduction in  
**MTTD and MTTR**

Cost savings compared  
**to siloed tool**

Increase in operational  
**efficiency**

## About Company

Mindarray Systems Pvt. Ltd. is a global IT product company that offers IT operation management solutions under the brand name Motadata consisting of Motadata AIOps and Motadata ServiceOps Platforms, which are built on a Deep Learning Framework for IT Operation (DFIT™) to increase efficiency and reduced the operational cost.

Motadata solutions utilize AI and ML to automatically correlate the metric, flows, logs, and events and turn them into actionable insights to reduce downtime and deliver true value to the investment.
