senhasegura®
FUNCTIONALITIES

REDES SOCIAIS

Manage and keep the credentials of the social networks of your company protected against undue publications and users with bad intentions.

SCAN AND DISCOVERY

Perform the search for devices and credentials in your network in and automatized manner and keep the solution prepared to serve all the access demands.

LOGGED SESSION

Define the users who will execute the logged session, monitored and 100% recorded, including simultaneous sessions.

SESSION RECORDING

Record 100% of the remote sessions performed in senhasegura in compact videos in excellent quality, including simultaneous sessions.

AUTOMATIC CHANGE

Automatically change the passwords every time the authorized expiration use is finished. Ensure the undertaking of each password.

APPROVAL WORKFLOW

Keep control of the access to a managed device or to a personal credential through a multilevel and flexible approval workflow.

APP TO APP

BRING TO SENHASEGURA THE INTEGRATION CREDENTIALS BETWEEN SYSTEMS, DATABASES OR CONFIGURED IN SOURCE CODE.
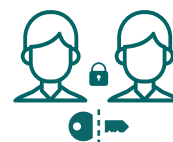

JUMP SERVER

Acessos via Putty ou RDP podem ser realizados através de sessões monitoradas, sem que a senha seja exposta ao usuário solicitante.

COMMANDS AUDIT

Configure commands alerts in SSH sessions, Telnet and databases even for administrator users.

MULTIPLE CUSTODY

Stablish double custody of passwords and keep the conformity with your security and audit controls.
